Re: Town & Country Optimist Parking Lot

Dear Mr. Gonzalez,

I am writing this letter of recommendation to you and your Company for the installation of the 115,000 sq. ft. parking lot with the Ecocreto pervious concrete installed in August, 2004.

We are proud to be the first to have a parking lot that was approved in the State of Texas, the City of Austin, and the Texas Commission on Environmental Quality to be used as our water quality & detention pond system. By using the Ecocreto system we were able to eliminate the standard detention pond system associated with such a large project. In so doing, we avoided the long term mess and maintenance of a storm water runoff pond which can be a safety issue in a youth sports complex as large as ours. Additionally, the pervious concrete parking lot allowed us to save the land that would have been used for detention to construct a Miracle League Baseball Field for handicapped kids.

The parking lot is holding up very well and continues to function the way it was designed. We are very happy with our decision to use Ecocreto and I would recommend this system to anyone that needs to utilize their property more efficiently and cares about replenishing our drinking water in the Edwards Aquifer. Please don't hesitate to call me if you have any questions.

Sincerely,

Greg Dettman
Vice President
Town and Country Optimist Club
